

PRINTING TECHNOLOGY & INNOVATION DAYS FOR FLEXIBLE PACKAGING

20 / 21 March 2019
Jakarta, Indonesia

PRINTING TECHNOLOGY & INNOVATION DAYS FOR FLEXIBLE PACKAGING

HOSTED BY:

janoschka

PRINTING TECHNOLOGY & INNOVATION DAYS FOR FLEXIBLE PACKAGING

State of the art printing solutions for gravure and CI-Flexo

Bülent Dil

Division Manager Technical Sales Printing and Finishing,
W&H

Rotogravure Technology!

Unique features enable HELIOSTAR'' to run 500m/min production speed at the highest quality level

Rotogravure Technology!

Fully integrated machine

Rotogravure Technology!

Fully integrated machine - PROCONTROL

Press, print inspection and additional systems in one hand

- Job data entry only once, all data in memory. Fewer mistakes and faster setup
- Common control system, optimized interfaces. Highest reliability
- One contact partner, W&H IDC availability and remote access for all systems

Rotogravure Technology!

Drying System

- Strong and sharp air knife technology
- Highest energy efficiency
- Wide operating range with variable nozzle exit air velocity (30 – 46 m/s)
- Maximum drying performance for extensive ink application, cold seal
- Unique nozzle design

Flexo Technology!

Flexo Technology!

STRONG!

PRINTING DECKS

Frame and deck design even for most demanding print jobs

Identical print results on all decks

Minimized bouncing at any speed, because of satellite print deck configuration

Fast and Safe sleeve change over
Sleeve pushout device

Flexo Technology!

POWERFULL!

DRYING SYSTEM

Homogeneous drying across the web
Low solvent retention

High nozzle air velocity
Adjustable air flow and temperatures
High energy efficiency

Easy access to nozzles at
between-color-drying and tunnel-drying

Flexo Technology!

EFFICIENT!

INKING SYSTEM

Homogeneous inking across the web
Integrated viscosity and temperature control

Shortest cleaning cycle time
Best cleaning results
Fast change of doctor blades and seals

Low wear on blades and side seals
Lowest possible ink/solvent waste
Minimum maintenance requirements

TURBOCLEAN

Flexo Technology!

FAST!

IMPRESSION SETTING SYSTEM

Perfect print impression setting
HD topography measurement

Use of existing printing sleeves
Integrated impression diagnostics

Min. change-over time
Low waste during impression setting

EASY-SET

Flexo Technology!

FAST!

REGISTER SETTING SYSTEM

- Register setting based on inline camera signal
- Register setting based on sensors

Min. change-over time
Zero waste for register setting

Easy preparation of printing sleeves

EASY-REG

Flexo Technology!

SMART!

CONTROL SYSTEM

Intelligent machine operation
Self adjusting machine parameters
according to fault detection

Intuitive machine operation
Head-up Display Technology

Integrated Vision System
Reduced Setup time through a
common Graphic User Interface

THANK YOU FOR YOUR ATTENTION.
